## SUMMARY

I'm a dedicated and curious student currently pursuing a diploma in Computer Science from Government polytechnic. I'm passionate about technology, software development, and solving real-world problems through code, and I'm actively building skills in areas like programming, software engineering, and agile development. Beyond the classroom, I've earned certifications from Infosys Springboard in Software Engineering and Agile Development, which have helped me strengthen both my technical and collaborative skills. These experiences have laid a solid foundation in problem-solving, teamwork, and communication, and sparked my interest in exploring roles in software development and tech innovation. I'm always eager to learn, connect with professionals, and contribute meaningfully wherever I can. I'm currently seeking internships, mentorship, or project-based opportunities to continue applying what I learn in real-world environments and grow as a future software engineer. Let's connect — I'd love to hear your story and learn from your experience!

## KEY ACHIEVEMENTS

### Aspire leaders program MODULE 1

Proud to Share a Milestone!

I'm excited to announce that I've successfully completed Module 1: Personal and Professional Development of the 2025 Aspire Leaders, a globally recognized leadership development journey.

This module involved over 15 hours of learning, reflection, and growth, and I'm truly grateful for the opportunity to expand my leadership potential.

A heartfelt thank you to the Aspire Institute and their incredible moderators and support team for guiding and inspiring us every step of the way.

Looking forward with great enthusiasm to Module 2, where I'll continue to learn and grow with a global community of driven peers
